**Our innovative approach and investment in industry-leading technology has been recognised by The Waste Authority of Western Australia with a grant of $245,000 for our project at 95 Talbot Road Hazelmere in 2019.**

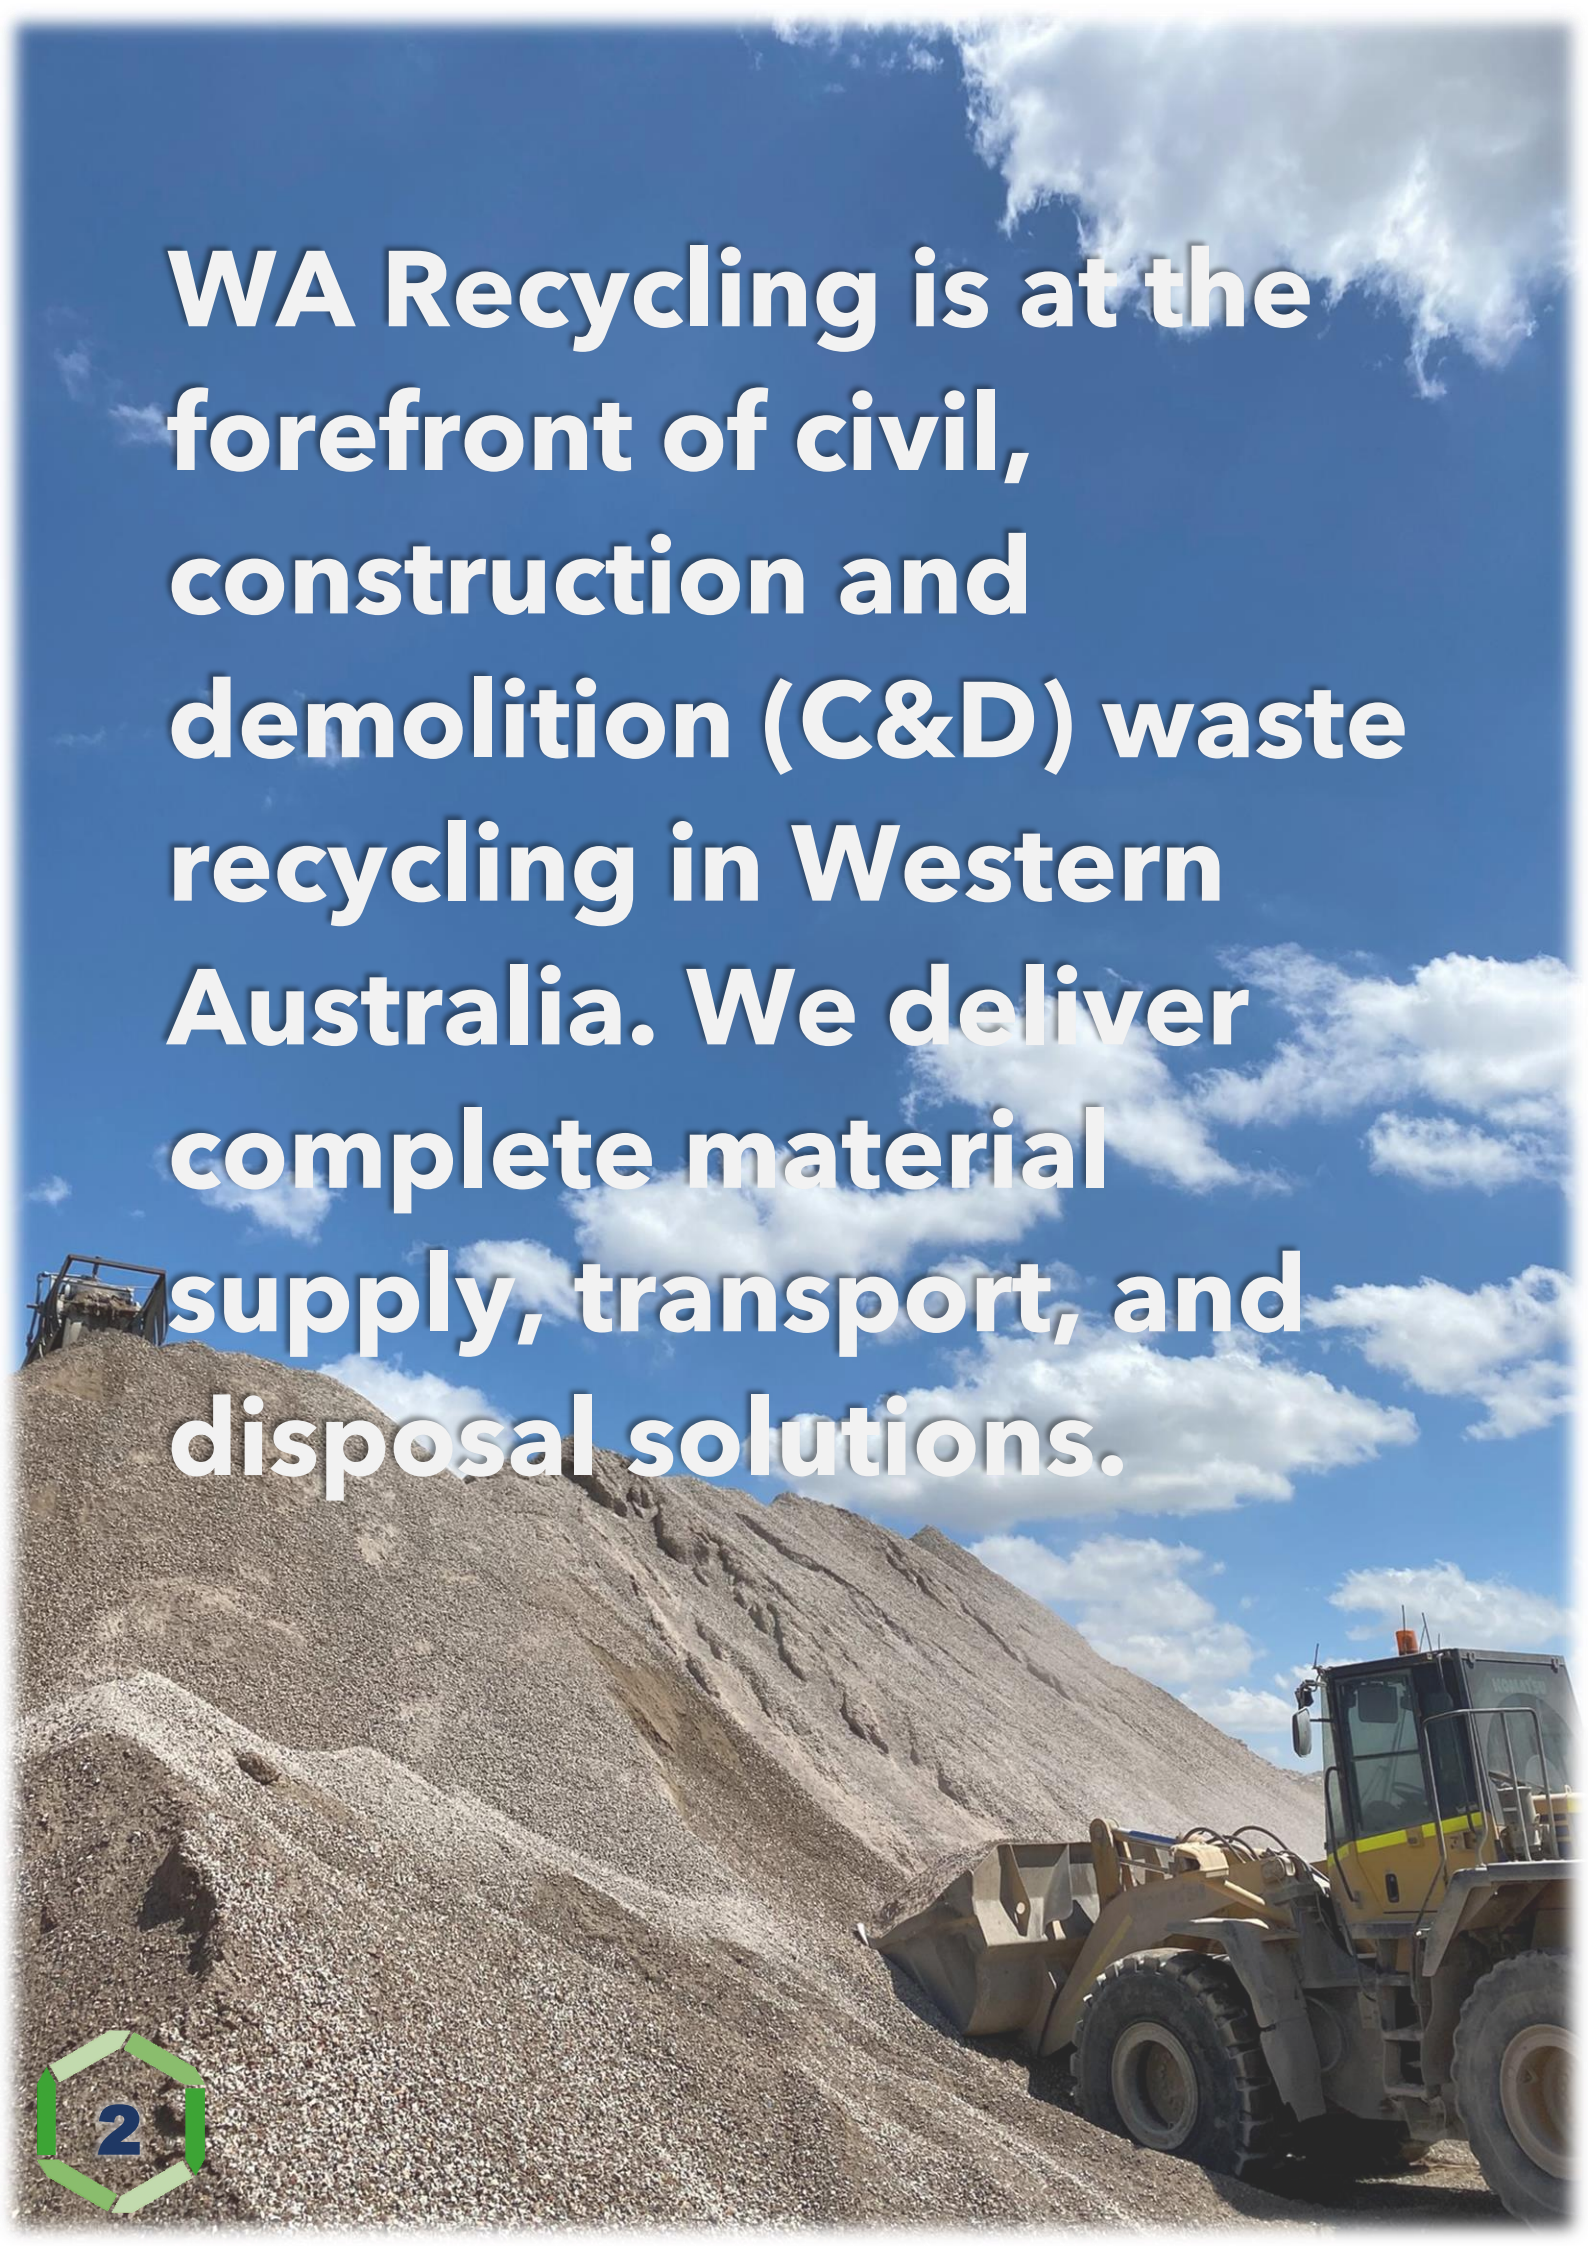
WASTE AUTHORITY WA...TOO GOOD TO WASTE

WRIWA

PLANET ARK

WMRR WASTE MANAGEMENT & RESOURCE RECOVERY ASSOCIATION AUSTRALIA

WALGA PREFERRED SUPPLIER



WA Recycling is at the forefront of civil, construction and demolition (C&D) waste recycling in Western Australia. We deliver complete material supply, transport, and disposal solutions.

# Who Are We?

**Established in 2010, WA Recycling are Western Australia's respected leading construction and demolition waste, recycling and recovery specialists. We recycle civil, construction and demolition waste into reusable products so the wider community benefits. We deliver resourceful and sustainable waste management solutions for the civil, construction and demolition industry.**

We're focused on maximising resource value with an aim to minimise, and ideally eliminate the environmental impact, so that both our economy and environment can thrive.

WA Recycling is committed to helping Western Australia exceed its targets of reusing and recycling 75% of waste generated by 2030. In fact, we recycle approximately 99% of the waste received.

By reducing landfill and producing recycled products, we are contributing to a more sustainable construction industry whilst preserving our natural resources for future generations.

Our state-of-the-art custom-built construction and demolition recycling facility has the potential to recycle 750,000 tonnes of waste per year and cater to projects of all scales and we were awarded a Waste Authority of Western Australia grant of $245,000 for this innovative facility.

We are passionate in our effort to close the loop on construction and demolition through recycling and regenerating waste into products such as recycled road base, aggregates and sand.

WA Recycling has been part or many major construction projects in supplying recycled road base, aggregates and sands and repurposing construction materials throughout the Perth metropolitan region including Tonkin Gap, Leach Welshpool Rd Interchange, Roe Highway and Kalamunda Rd and others.

We work closely with all our clients to provide them with a strategic and competitive advantage.

# Our People

**At the heart of WA Recycling, lies a team of talented and dedicated people. These people have a passion to thrive in their efforts in assisting the West Australian community reach its target to reuse and recycle at least 75% of waste generated by 2030.**

We believe our employees are one of our most valuable assets, and our success relies on each individual's enthusiasm, work ethic, integrity, accountability and professionalism in the workplace. We work hard to create a safe enjoyable workplace through minimising the risk of injury and illness, while promoting positive health and wellbeing, both physically and mentally. We are strongly focused on equal opportunity and continually support and encourage our staff with on-going training and mentoring.

## Our Vision

To Achieve Zero Waste In Landfill Across The Waste Streams We Operate Within.

## Our Mission

To Make Your Difficult To Recycle Waste – Recyclable.

## Our People and Core Values

Every member of our team is qualified in their respective roles and backed by stringent quality management. We pride ourselves on providing quality customer service and premium products ensured by formalised strategies, systems and procedures. We pride ourselves on customer satisfaction and the quality of work we deliver to our customers. We stand by our values which guide the way we work on every project.

# WA RECYCLING
## MATERIAL SOLUTIONS CAPABILITY

### TRANSPORT FLEET
Legally compliant trucks of various specification

### ABILITY TO SUPPLY
Various load capabilities including bulk volumes

### BROAD RANGE
Recycling solutions for construction and demolition (C&D) waste streams

### SUPPLY RECYCLED
and virgin products

**WA Recycling providing you with sustainable waste solutions and manufacturing the highest quality products to achieve the best possible outcome for you and the environment.**

## Why Working With Us

We utilise state of the art processing methods to ensure the waste products we receive are recycled.

- We maintain stringent management controls to manufacture high quality products that are vigorously tested and meet both geotechnical and environment standards
- We're a Department of Environment and Water Regulation approved facility
- We maintain stringent safety standards
- We can save you money and help improve your environmental credentials
- We're centrally located, just 18km from the Perth CBD

We value our customers as we value the environment and pride ourselves on quality, open and honest transparent customer service.

We will take the time required and steps to analyse each and every potential client's unique requirements.

We will collaborate with you to design the best waste management method and solution that delivers maximum efficiencies and cost savings to you, whilst also benefiting the environment.

**Breaking Down The Waste Barrier**

# Your Project Solutions

WA Recycling can support the largest civil contracts with every aspect of the projects material management needs. We work to create sustainable solutions for your business in the areas of waste processing, transfer site operations, transport and logistics services.

We have collectively 30 years of knowledge and experience in waste management, recycling and sustainability. Our dedicated team will work with you to solve your waste challenges and create sustainable business practices to ensure your waste management is more economical, whilst also benefiting the environment.

From small businesses, large corporations to local and state government infrastructural projects, we provide comprehensive and personalised waste solutions to our varied customers. Many of our customers use our facility to have their waste recycled into products that they can re-use on their projects, thereby closing the recycling loop.

Using our extensive market knowledge and supplier network, we can deliver the best available solutions to meet your project specifications, goals, budget and timeframe.

**Waste Transport & Collection**

We offer collection and transport of various waste products including civil, construction and demolition material, soils and sands, or old rail ballast. Our state of the art recycling plant has been designed to process a range of materials and our flexible approach means we can adapt to projects of any size.

**Waste To Resource Operations**

Using our advanced technologies, we take your civil, construction and demolition waste and recycle it into high-value road base, sand and aggregates that can be used for various projects including commercial construction.

We have formed long-term relationships with key suppliers across the industry.

# Keep Your Project Moving

At WA Recycling, we are involved in the entire waste life cycle. From collection to final treatment, we make resource recovery, recycling and reuse of collected waste our priority.

We constantly look for ways to reduce the cost of moving materials and know that timing is critical. Our comprehensive material management system allows us to efficiently coordinate fill supply and disposal.

We manage a modern transport fleet operated by experienced and qualified sub-contractors. They are carefully selected and share our work ethics which operate to our strict compliance standards.

Our transport fleet comprises:

- Truck and Tri Axle Trailers
- Truck and Quad Axle Trailers
- Semi-Trailers
- 8 Wheelers
- 10 Wheelers

We always have the fleet capacity to keep your project on track. All vehicles are appropriately licensed, registered and maintained. Our sub-contractors have appropriate insurances and work health and safety policies in place.

We manage a transport fleet of compliant and qualified vehicles to keep your project moving.

# Products And Services

**At WA Recycling, we have made a considerable investment and dedicated many years in developing our state of art facility. Our aim is to provide better service and high quality recycled products. We believe every bit of waste produced has potential for reuse. We're passionate about closing the loop on civil, construction and demolition (C&D) waste, by diverting it from landfill and giving your end of life products – a new life.**

## We accept the following materials for recycling

- ✓ Civil, Construction and demolition waste
- ✓ Waste soils and clays
- ✓ Concrete with or without reinforcement
- ✓ Granite, gravels and similar materials
- ✓ Cleanfill (sand, clay, limestone)
- ✓ Rock
- ✓ Brick, ceramics and roof tiles
- ✓ Asphalt
- ✓ Plasterboard
- ✓ Wetmix washout concrete
- ✓ Horizontal drilling/vacuum excavation waste

## Our Recycled Products

**Road Base**
20mm recycled road base is made to IPWEA/WALGA specification.

**Fill Sand**
Specially designed for house pads, bedding sand, backfill or can be used for general purposes.

**Aggregates**
These aggregates can be used for wide range of purpose including drainage and filtering applications, retaining walls or landscaping. It is 100% recycled and available in the following sizes:

- 7mm - 10mm
- 10mm – 14mm
- 10mm – 20mm
- 20mm – 30mm

(Note: we can custom make material to your specification)

**Rigorous testing on our products to certify it is free of contaminants and tested in accordance with Australian Standards by an independent NATA accredited laboratory**

# Our Approach

At WA Recycling, safety is always at the forefront.  It takes unconditional priority in the way we work and on every project. We back this with stringent policies and procedures and more importantly, it is embedded in our culture.

Our capability is built on our environmentally smart practices, the skills of our staff, strong supplier relationships and a focus on quality. You can be confident that they have the depth of knowledge, experience and are market savvy in transport and materials management to support your project. Together with our skilled team, they play a key role in our exceptional service delivery.

We know that positive project outcomes are built on well-defined systems. This approach means that we can identify and remedy any issues that might occur during your project. Our clients can be certain that we can provide detailed documentation to meet their requirements.

We also understand how our operations could affect the environment and work site safety. To maintain the highest standard of project management and delivery, we complete all work under independent accreditation systems.

WA Recycling maintains up-to-date OHS plans, risk management and emergency procedures along with the insurance and qualifications required to meet commercial and government tender requests. We aim to deliver a level of work that is beyond compliance.

# Quality Assurance

WA Recycling have a comprehensive management system that exceeds Quality, Environmental and Occupational Health and Safety standards. We actively pursue continual improvement in environmental management via the WA Recycling Environmental Management Plan, systems and processes.

Our facility is a Department of Environment and Water Regulation approved and licensed facility, we are a WALGA Preferred Supplier and Certified to supply Crushed Recycled Concrete to Main Roads WA. We maintain stringent management controls resulting in high quality end products.

Our innovative approach and investment in industry-leading technology has been recognised by The Waste Authority of Western Australia with a grant of $245,000 for our project at 95 Talbot Rd Hazelmere in 2019.

We are open to the public and hold an impeccable safety record in accordance with all Government and Safety Regulations.

We keep abreast with the latest regulations and innovations. These bodies include the WRIWA, Planet Ark and WMRR.
